## Texture, Character & Creative Possibilities

Here at Futura Leathers, we are pleased to introduce a new range of embossed and printed leather finishes designed to bring texture, character and individuality to leather interiors. Using specialist embossing techniques, our premium leather hides can be transformed with a variety of distinctive surface designs — from subtle woven textures and elegant geometric patterns to bold reptile and exotic-inspired finishes. This allows designers, upholsterers and manufacturers to introduce unique visual interest while retaining the natural performance, durability and quality of genuine leather.

### Our collection includes textures inspired by:

- Woven and textile - style surfaces
- Architectural and geometric patterns
- Reptile and exotic leather effects
- Natural grain enhancements
- Decorative and ornamental designs

Each finish is carefully produced so the leather retains its softness, flexibility and durability, making it suitable for upholstery and interior applications.

### Designed for Creative Interiors

Embossed and printed leather is a popular choice for designers looking to introduce depth, texture and distinctive detail into their projects.

### Here at Futura Leathers, embossed finishes are commonly used for:

- Upholstered furniture
- Hospitality and hotel interiors
- Headboards and wall panels
- Retail and commercial interiors
- Automotive and marine applications
- Bespoke design features

Whether used as a subtle texture or a bold statement surface, embossed leather can add character and refinement to any interior space.

### Quality You Can Trust

As with all Futura leather collections, our embossed hides are selected and processed to ensure:

- Consistent colour and finish
- Durable performance for interior environments
- Excellent flexibility for upholstery work
- Reliable supply for both small and large projects

From single hides to large project quantities, we work closely with designers, upholsterers and manufacturers to help select the most suitable leather and embossing finish.

### Work with Futura Leathers

Here at Futura Leathers, we have been supplying premium leather hides to the global design, upholstery and manufacturing industries for over 25 years.

If you are interested in incorporating embossed leather into your next project, our team will be happy to discuss the most suitable leather range, embossing pattern and finish.

# Embossing ranges & guidelines

A selection of our leather ranges can be embossed on request to create distinctive textured finishes.

## Embossing is currently available on the following ranges:

**Lustro** - available in all colours

**Premium** - available in all colours

**Silk** - available in all colours

**Rimini** - available in the following colours:

Cream, Caramel, Arabesque, Marrone, Chocolate, Wine, Oxblood, Indigo, Sage, Foresta, Sapphire, Storm, Nero

**Highland** - available in the following colours:

Biscotti, Hazel, Dark Brown, Whiskey, Conker, Nut Brown, Rouge, Claret, Ink, Nettle, Thyme, Thunder, Black

Our team will be happy to help advise on the most suitable leather and embossing finish for your project.

### Minimum Order Quantities

The minimum order quantity for embossed leather is one full hide. For the Premium range, embossing is only available on half hides.

### Lead Times

- Embossing is carried out to order and typically takes approximately 7–14 days.
- Once completed, hides usually require an additional 7–10 days to reach our UK warehouse.
- For urgent requirements, hides can be expressed to the UK in approximately 1–2 days at an additional cost.

### Important Information

Leathers from this “Special Emboss” Collection are commonly used for decorative parts and objects. Avoid use in seating furniture or parts where the leather is under pressure or pulled, as the embossed pattern can flatten or fade with time.

All embossed hides are produced specifically to order.

- Prepayment is required before embossing begins
- Once hides have been embossed, changes or cancellations are not possible

### Natural Variations

As leather is a natural material, slight variations in embossing may occur across each hide.

- Overlapping or plate lines may occasionally be visible as part of the embossing process.
- The leather surface is pressed with a plate to imprint the pattern.
- Each plate has a limited size, consequently the hide is embossed several times to cover the entire area.
- Depending on the hide size it can be up to 6–8 times. Plate lines or overlaps are visible on the leather surface.
- Cuttable clear panel size cannot be guaranteed for the patterns as each hide has an individual size.
- Leather, being a natural product may take the embossing effect differently across the hide.

### Example of overlap / plate lines
